Re: Comment Deadlines Established Regarding the LightSquared Technical  
Working Group Report, IB Docket No. 11-109

Dear Ms. Dortch,

We are at crossroads here in America. The demand for wireless capabilities is growing at tremendous rate and the current infrastructure is quickly becoming overloaded. What we need now is a new network to handle this increased demand and it is frightening that efforts to create this new network are being blocked.

LightSquared is taking all necessary steps to provide this needed expansion of the broadband network but the GPS industry is refusing to work with them to allow it to go forward. Without a doubt interference with GPS technology can be problematic but it is my understanding that simple adjustments on their end could be made to solve any issue. The benefits LightSquared brings are too many to let this be dragged out any longer.

Our economy needs the boost the LightSquared has the potential to bring. Please find a solution to this debate so that we can get moving in the right direction.

Sincerely,

A handwritten signature in black ink that reads "Scott Williams". The signature is fluid and cursive, with a horizontal line extending from the end of the name.

Scott Williams
